PREFACE

This nineteenth edition of the Florida Statistical Abstract continues a tradition of providing comprehensive and timely economic and demographic information about Florida. Every effort is made to publish the most up-to-date figures possible. However, because these data have been collected by many entities--state and federal, private and public--they cover activities occurring in different periods of time. It is impossible to insure uniformity, but time periods are always stated in the tables.

When the statistics on some subject have not been updated at press time, these data may not be repeated. The user is encouraged to use tables in earlier editions, particularly for census data. At the back of this edition is an index of census tables appearing in previous editions.

The purpose of the Florida Statistical Abstract is twofold: (1) the Abstract presents a great deal of statistical information in tabular form, and (2) it serves as a guide book to sources from which the statistics have been taken. The sources of data are listed at the bottom of each table in the Abstract. In almost every instance more detail exists in the source than can be included in the Abstract, and sometimes the issuing agency has additional data or more recent information after the Abstract goes to press. Suggestions for locating sources or obtaining additional information are contained in the Appendix at the end of the book.

Organization of the Florida Statistical Abstract. The Abstract is organized into five major parts each of which is subdivided into sections. Table numbers correspond to the section numbers. The first part (Sections 1.00 through 7.00) of the Abstract includes those tables that present information about characteristics of the population: number of people, housing, health, education, income, employment, and welfare. The next three parts (Sections 9.00 through 23.00) refer to establishments engaged in economic, social, and political activities.

Sections 9.00 through 23.00 present information about establishments rather than individuals. These establishments are classified by the type of activity in which they are engaged according to the Standard Industrial Classification (SIC). This system has been developed by the U.S. Office of Management and Budget and is published in the Standard Industrial Classification Manual, 1972. The Manual defines an establishment as "an economic unit generally at a single physical location where business is conducted, or where services or industrial operations are performed." An establishment is not necessarily identical with an enterprise or company which may consist of more than one establishment. Both profit making and not-for-profit organizations are included as well as agencies of the federal, state, and local governments. Major industries are assigned two-digit SIC codes: 20 through 99; subdivisions are classified by three- and four-digit codes.

The last part of the Abstract contains tables of a comparative nature: economic and social trends. Time series showing the fluctuations of such major economic activities as income, prices, and employment are given in Section 24.00. Measures of the quality of life in Florida and other states are given in Section 25.00.

Fiscal years. In 1976 the federal fiscal year was changed to extend from October 1 of one year through September 30 of the next. The fiscal year of the State of Florida is July 1 of one year through June 30 of the next. In a few cases where a reporting organization, particularly one of the Florida cities, has a different fiscal year, the months included are stated in the table.

Covered employment and payroll. A number of tables are composed of statistics relating to employment and payroll covered by the unemployment compensation law of Florida and the federal government. These data are supplied in unpublished form by the Bureau of Research and Analysis, Division of Employment Security, Department of Labor and Employment Security, State of Florida. Readers should keep in mind that some types of employees are not covered by the unemployment compensation law. An explanation of the limitations of these data is to be found in the Appendix under the notes on Section 6.00.

Bureau of Economic and Business Research. The activities of the Bureau are organized around four research areas: forecasting, population, and survey programs and local government studies. The Bureau staff consists of five research economists, seven professional researchers, six support persons, eight clerical employees, six graduate students, and eighteen student assistants.

Acknowledgements. The preparation of this edition of the Abstract was shared by many members of the staff of the Bureau. Susan Floyd served as managing editor and directed the collection of data sources. Amy Banta was responsible for the required statistical computations, page layouts and supervision of the student assistants. Susan and Amy were assisted by statistical aide Linda Dew and part-time staff aide Theresa Loper and student assistants Grace Johnson, Arlen Jones, Cindy Cuomo, Sheryl Triccoci, Karen Higgins, and Amy Atkins. Janet Fletcher, Pam Middleton, and Betty Lee provided assistance with promotional activities and Susan Johnson provided assistance with the index. BEBR Data Base support was provided by Janet Galvez. For the first time in the history of producing the Abstract, one person, Dorothy Evans, was responsible for all word processing. Ann Pierce provided editorial consultation and supervised the graphics preparation. Shar Rushing designed the graphical introductions and Dan Nevins assisted in the preparation of the graphics and the cover. The staff of the University Presses of Florida provided production assistance and handles distribution. Frances Terhune, former editor of the Abstract, continued to provide consultation and support.

We would be happy to receive suggestions for improving the usefulness of the Florida Statistical Abstract to you and your organization.

(X) NOT APPLICABLE.

1/ FIGURES HAVE BEEN ADJUSTED TO CONSTITUTE A SUBSTANTIALLY CONSISTENT SERIES BASED ON INCORPORATED PLACES OF 2,500 OR MORE PERSONS WITH ADDITIONAL AREAS DEFINED AS URBAN UNDER SPECIAL RULES.

2/ THE CURRENT URBAN DEFINITION DEFINES THE URBAN POPULATION AS ALL PERSONS LIVING IN URBANIZED AREAS AND IN PLACES OF 2,500 OR MORE PERSONS OUTSIDE URBANIZED AREAS. AN URBANIZED AREA COMPRISES AN INCORPORATED PLACE AND ADJACENT DENSELY SETTLED SURROUNDING AREA THAT TOGETHER HAVE A MINIMUM POPULATION OF 50,000. POPULATION NOT CLASSIFIED AS URBAN CONSTITUTES THE RURAL POPULATION. RURAL CLASSIFICATION NEED NOT IMPLY FARM RESIDENCE OR A SPARSELY SETTLED AREA BECAUSE A SMALL CITY IS RURAL AS LONG AS IT IS OUTSIDE AN URBANIZED AREA AND HAS FEWER THAN 2,500 PERSONS.

NOTE: STATE PROJECTIONS ARE BASED ON THREE DIFFERENT SETS OF ASSUMPTIONS REGARDING ANNUAL NET MIGRATION. THE HIGH PROJECTIONS ARE SIMILAR TO THE LARGE MIGRATION LEVELS OF THE FIRST HALF OF THE 1970S WHEN MORE PEOPLE WHERE MIGRATING TO FLORIDA THAN EVER BEFORE. THE LOW MIGRATION LEVELS ARE SIMILAR TO THOSE BETWEEN 1975 AND 1977 WHEN FLORIDA POPULATION GROWTH RATES WERE AMONG THE LOWEST SINCE WORLD WAR II. THE MEDIUM ASSUMPTIONS IMPLY ANNUAL NET MIGRATION LEVELS SIMILAR TO THE AVERAGE IN THE 1970S. COUNTY PROJECTIONS ARE BASED ON AN AVERAGE OF PROJECTIONS DERIVED FROM TEN DIFFERENT TECHNIQUES. FOR THE MEDIUM SERIES, THE SUM OF THE COUNTY PROJECTIONS EQUALS THE STATE PROJECTION FOR EACH YEAR (EXCEPT FOR SLIGHT DIFFERENCES DUE TO ROUNDING). FOR THE HIGH AND LOW SERIES, HOWEVER, THE SUMS OF THE COUNTY PROJECTIONS DO NOT EQUAL THE STATE PROJECTIONS. THE 1984 ESTIMATES HAVE BEEN USED AS THE BASE FROM WHICH TO GENERATE THESE PROJECTIONS. FOR A MORE DETAILED DISCUSSION OF METHODOLOGY, SEE THE SOURCE.

1/ VACANT UNITS INTENDED FOR SEASONAL OCCUPANCY OR HELD FOR MIGRATORY LABOR. IF SUCH UNITS ARE OCCUPIED BY PERSONS WHO HAVE A USUAL RESIDENCE ELSEWHERE, THEY ARE CLASSIFIED AS VACANT.

2/ ALL OCCUPIED UNITS PLUS VACANT UNITS INTENDED FOR YEAR-ROUND USE.

3/ UNITS OCCUPIED AS THE USUAL PLACE OF RESIDENCE OF ONE PERSON OR GROUPS OF PERSONS. BECAUSE A HOUSEHOLD CONSISTS OF ALL PERSONS WHO OCCUPY A HOUSING UNIT, THE COUNT OF OCCUPIED UNITS AND HOUSEHOLDS IS IDENTICAL.

NOTE: DATA WERE OBTAINED FROM THE 1984 FALL STUDENT SURVEY, ESE 269. BECAUSE SOME HIGH SCHOOLS DO NOT HAVE A FORMAL FOLLOW-UP PROGRAM FOR GRADUATES, IT WAS NECESSARY FOR THE PRINCIPAL OR GUIDANCE COUNSELOR TO PREPARE ESTIMATES FOR SOME OF THE ITEMS INCLUDED. FIGURES INCLUDE TWELFTH GRADE GRADUATES FROM ADULT CENTERS AND EXCEPTIONAL AND GIFTED SCHOOLS.

1973	4,540	133.1			
1974	5,038	147.7			
1975	5,500	161.2			

NOTE: POVERTY THRESHOLDS ARE BASED ON A DEFINITION DEVELOPED BY THE SOCIAL SECURITY ADMINISTRATION IN 1964 AND REVISED BY A FEDERAL INTERAGENCY COMMITTEE IN 1969 AND 1980. ANNUAL ADJUSTMENTS ARE BASED ON CHANGES IN THE CONSUMER PRICE INDEX. THE POVERTY INDEX IS BASED ON MONEY INCOME AND DOES NOT TAKE INTO ACCOUNT NONCASH BENEFITS, SUCH AS FOOD STAMPS, MEDICAID, AND PUBLIC HOUSING. DIFFERENCES IN POVERTY THRESHOLDS BASED ON FARM-NONFARM RESIDENCE HAVE BEEN ELIMINATED. NONFARM THRESHOLDS NOW APPLY TO ALL FAMILIES.

1/ FULL- AND PART-TIME JOBS.

2/ INCLUDES ONLY PERSONS WHO ARE PRIMARILY SELF-EMPLOYED.

3/ THIS RATIO TENDS TO OVERSTATE THE SELF-EMPLOYED INCOME PER PROPRIETOR BECAUSE THE INCOME ACCOUNT IS MORE COMPREHENSIVE THAN THE NUMBER OF PROPRIETORS.

UG/M^3 MICROGRAMS PER CUBIC METER.

A/ SITE WAS NOT OPERATED OR HAD LESS THAN ONE-HALF OF ITS SCHEDULED OBSERVATIONS.

1/ SOURCE INCLUDES MORE SITES THAN COULD BE REPORTED HERE. MAJOR CITIES IN EACH COUNTY ARE REPORTED. IF MORE THAN ONE SITE WAS AVAILABLE, THE ONE WITH THE HIGHEST ANNUAL GEOMETRIC MEAN IS REPORTED.

2/ FLORIDA STANDARD IS 150 UG/M^3, NOT TO BE EXCEEDED MORE THAN ONCE PER YEAR.

3/ FLORIDA STANDARD IS 60 UG/M^3.

NOTE: PARTICULATE DESCRIBES AIRBORNE SOLID OR LIQUID PARTICLES OF ABOUT 0.0001 TO 500 MICRONS IN DIAMETER (1 MICRON = 0.0001 CENTIMETER). TSP CONSISTS OF SULFATE, NITRATE, AND ACIDIC PARTICLES FORMED BY OXIDATION OF THE POLLUTANT GASES SULFUR DIOXIDE AND NITROGEN DIOXIDE; OF SOOT AND ORGANIC PARTICLES RELEASED IN FOREST FIRES AND OTHER LOW-TEMPERATURE COMBUSTION PROCESSES; OF LEAD-CONTAINING PARTICLES EMITTED FROM MOTOR VEHICLES; OF PRODUCTS OF INDUSTRIAL PROCESSES AND HIGH TEMPERATURE FUEL COMBUSTION; OF LOCAL SOIL; AND OF AIRBORNE SEA SALT.

NOTE: THE FARM POPULATION IS IDENTIFIED ONLY IN RURAL AREAS AND IN 1980 INCLUDES ALL PERSONS LIVING ON PLACES OF 1 ACRE OR MORE FROM WHICH AT LEAST $1,000 WORTH OF AGRICULTURAL PRODUCTS WERE SOLD DURING 1979. IN 1970 A FARM WAS DEFINED AS A PLACE OF 10 OR MORE ACRES WITH AT LEAST $50 WORTH OF ANNUAL SALES OR A PLACE OF UNDER 10 ACRES WITH AT LEAST $250 WORTH OF SALES. PART OF THE DECLINE FROM 1970 IS THE RESULT OF THIS DEFINITION CHANGE AND PART FROM THE 1980 CENSUS UPDATING OF URBAN-RURAL BOUNDARIES. 1970 NUMBERS HAVE BEEN CORRECTED SINCE THE PUBLICATION OF PRINTED SOFTBOUND 1970 REPORTS.

A/ REVISED.

B/ PRELIMINARY.

1/ STATES WITH 1984 SHIPMENTS OF 2,000 OR MORE ARE LISTED.

NOTE: SHIPMENTS FIGURES ARE BASED ON REPORTS SUBMITTED BY MANUFACTURERS ON THE NUMBER OF MOBILE HOMES ACTUALLY SHIPPED DURING THE SURVEY MONTH. SHIPMENTS TO DEALERS MAY NOT BE PLACED FOR RESIDENTIAL USES IN THE MONTH AS THEY ARE SHIPPED. THE NUMBER OF MOBILE "HOMES" USED FOR NONRESIDENTIAL PURPOSES IS NOT KNOWN. THESE SHIPMENTS STATISTICS ARE PRODUCED BY THE NATIONAL CONFERENCE OF STATES ON BUILDING CODES AND STANDARDS. SEE GLOSSARY FOR DEFINITION OF MOBILE HOME.

1/ EXCLUDES SHORT-TERM NOTES AND REFUNDING BOND ISSUES.

2/ EXCLUDES AMOUNTS ALLOCATED FOR COLLECTION EXPENSES AND NONHIGHWAY PURPOSES. REVENUES ARE SEGREGATED ACCORDING TO THE COLLECTING AGENCY. AMOUNTS SHOWN FOR FEDERAL AGENCIES ARE MOSTLY GRANTS-IN-AID PAYMENTS.

3/ DISBURSEMENTS ARE CLASSIFIED BY SYSTEM ON WHICH EXPENDED, RATHER THAN BY EXPENDING AGENCIES; CAPITAL OUTLAY ON COUNTY AND OTHER LOCAL RURAL ROADS INCLUDES EXPENDITURE FROM FEDERAL, STATE, AND LOCAL FUNDS.

4/ SUMMARY OF RIGHT-OF-WAY COSTS WHICH ARE INCLUDED IN LOCAL, STATE, AND FEDERAL CATEGORIES.

NOTE: THIS TABLE PRESENTS COMBINED SUMMARIES OF THE HIGHWAY FINANCES OF ALL GOVERNMENT AGENCIES IN NET AMOUNTS; DUPLICATIONS THAT WOULD OTHERWISE HAVE RESULTED FROM INTERFUND OR INTERGOVERNMENTAL TRANSFERS HAVE BEEN REMOVED. DATA MAY INCLUDE ESTIMATES.

NOTE: THESE SALES WERE REPORTED TO THE DEPARTMENT OF REVENUE FOR THE 5 PERCENT REGULAR SALES TAX, THE 5 PERCENT USE TAX, AND THE 3 PERCENT VEHICLE AND FARM EQUIPMENT SALES TAX FROM JANUARY TO DECEMBER OF EACH YEAR. THE SALES OCCURRED, FOR THE MOST PART, FROM DECEMBER OF THE PREVIOUS YEAR THROUGH NOVEMBER OF THE POSTED YEAR. THESE DATA ARE NOT COMPARABLE WITH RETAIL SALES FIGURES REPORTED BY THE BUREAU OF THE CENSUS OR THOSE ESTIMATED BY THIS BUREAU PRIOR TO 1970 BECAUSE OF DIFFERENCES IN DEFINITIONS OF RETAILERS AND RETAIL SALES. AT VARIOUS TIMES, CHANGES IN THE RATE OF THE TAXES OR IN THE ITEMS TO BE TAXED OR EXCLUDED HAVE BEEN MADE.

NOTE: THE FLORIDA PRICE LEVEL INDEX IS A SET OF NUMBERS WHICH REFLECTS THE PRICE LEVEL IN EACH COUNTY RELATIVE TO POPULATION-WEIGHTED STATEWIDE AVERAGE (100 FOR EACH CATEGORY) FOR A PARTICULAR POINT IN TIME, 1984. IT MEASURES PRICE LEVEL DIFFERENCES FROM PLACE TO PLACE IN CONTRAST TO THE CONSUMER PRICE INDEX PREPARED BY THE U.S. BUREAU OF LABOR STATISTICS, WHICH MEASURES PRICE LEVEL CHANGES FROM MONTH TO MONTH. THE BASIS FOR THESE COMPARISONS IS ONE OF FIXED STANDARD OF LIVING WHICH REPRESENTS THE CONSUMPTION PATTERN OF A TYPICAL WAGE EARNER OR CLERICAL WORKER. THE INDEX MEASURES IN EACH COUNTY THE RELATIVE COST OF LIVING BY THIS STANDARD. SEE TABLE 24.78 FOR RELATIVE WEIGHTS OF ITEMS PRICED.

APPENDIX. GENERAL EXPLANATORY AND SOURCE NOTES BY SECTION AND SUMMARY OF SOURCES

SECTION 1.00. POPULATION

EXPLANATORY NOTES. The Bureau of Economics and Business Research Population Program prepared a revised series of intercensal population estimates for the 1970s appears on Table 1.20. Extreme caution must be exercised when deriving annual changes from successive estimates. Calculating such changes can lead to inaccurate conclusions regarding population growth, especially for small places. The best base for any estimate of population change is generally the most recent Census enumeration.

Counties and municipalities are legal and political entities, but, from a sociological point of view the community of which a person considers himself or herself to be a part may not correspond to such an entity. Terms like "Greater Jacksonville" or "the Miami area" are used to indicate the real community. People do not hesitate to cross city or county limits or even state lines to work, to buy or sell, or to seek cultural, medical, recreational, or social services. For this reason, the U.S. Office of Management and Budget has designated areas known as metropolitan statistical areas (MSAs). An MSA is a geographic area with a large population nucleus together with adjacent communities which have a high degree of economic and social integration with that nucleus. These areas were designated as standard metropolitan statistical areas (SMSAs) before January 1983. New MSA designations were announced effective June 1983. Under the new definition, generally an area qualifies for recognition as a MSA in one of two ways: if there is a city of at least 50,000 population *or* an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In addition to the county containing the main city, an MSA may also include additional counties which have close economic and social ties to the central county. In Florida MSAs are defined in terms of entire counties. Population living in MSAs may be referred to as the metropolitan population. There are twenty designated MSAs in Florida; nineteen were designated effective June 1983 and Naples-Collier County was designated June 1984. See Table 1.65 for population figures and the map at the front of this book for the list of counties in each Florida MSA as defined effective June 1983. There is also at the front of the book a map showing the old SMSA designations.

Agencies of the state government have designated various groups of counties as being parts of districts. There are eleven planning districts, each containing several counties which have common interests and needs for planning development in the area. A map in Section 1.00 shows the latest pattern of county assignment for planning districts. There are also Health and Rehabilitative Services Districts enumerated on a map in Section 7.00 and crop districts (map in Section 9.00).

SOURCES. The Census of Population taken once every ten years by the U.S. Bureau of the Census provides basic statistics about population. Selected data about Florida from the 1980 Census are included in this *Abstract*. Detailed data have been released by the Census Bureau in printed and computer tape formats. Some data appeared in earlier *Abstracts* and are not repeated this year. At the back of this *Abstract* is an *index of* all Census information which appears in previous editions. Recently the Bureau of Economic and Business Research published a collection of county Census data titled *1980 Census Handbook: Florida Counties*. This volume provides county Census data collected in one place, with some 1970 data included for comparison. There is also information on how to use

Census information, primary Census sources, and the meaning of Census terminology.

In addition to the decennial censuses the Census Bureau issues a series of Current Population Reports, known as P-Series. These contain national, regional, and sometimes state population statistics resulting from periodic surveys, special censuses, and cooperative estimation and projection efforts between the individual states and the Census Bureau.

Between census years estimates of the population of the state, counties, and municipalities of Florida are made by the Population Program, Bureau of Economic and Business Research (BEBR), University of Florida. These are released annually in Florida Estimates of Population.

The Abstract contains age, race, and sex data from the 1980 Census, as well as projections of population by age and sex. These projections were made by the Bureau of Economic and Business Research, University of Florida.

Data on veterans come from the U.S. Veterans Administration in Washington, which releases reports on the age, location, and period of service of veterans. Data on aliens are from the U.S. Immigration and Naturalization Service. Voting-age population is presented in Section 21.00.

SECTION 2.00. HOUSING

SOURCES. The decennial Census of Housing is taken simultaneously with the Census of Population and provides basic information about people in their living arrangements. This Abstract contains summary housing tables from the 1980 Census. (For more detailed discussion of census data see source notes on Section 1.00 of this Appendix.)

The Census Bureau issues subject series that provide statistics compiled on some subject from the decennial or special censuses. Table 2.16 presents information on persons in group quarters from the population subject series; Table 2.35 presents information on characteristics of mobile home occupancy from the housing subject series.

The Bureau of Economic and Business Research (BEBR), University of Florida makes annual estimates of the number of households and average household size for intercensal years. These estimates are published in Population Studies.

Two agencies of the State of Florida provide information related to housing. The Division of Motor Vehicles of the Department of Highway Safety and Motor Vehicles publishes annual totals of tags sold to owners of mobile homes and recreational vehicles. The Division of Hotels and Restaurants of the State Department of Business Regulation publishes statistics on apartment houses, rooming houses, and licensed lodgings.

Information on placements and average sales prices of mobile homes is available jointly from the U.S. Department of Commerce and Department of Housing and Urban Development.

The Directory of the Florida Association of Homes for the Aging provides a list of homes with location and number of units.

SECTION 3.00. VITAL STATISTICS AND HEALTH

EXPLANATORY NOTES. "Vital statistics" usually include data on births, infant deaths, abortions, illegitimate births, marriages, divorces, and annulments and deaths by cause. For births and deaths, "resident" is the term which indicates all births or deaths among residents of a specified area regardless of where the event occurred, while "recorded" is the term used to identify all births or deaths occurring in the specified area regardless of the usual residence of the person counted. The birth and death figures in this section are resident data. Marriages and dissolutions of marriage are report by place of occurrence.

SOURCES. The Public Health Statistics Section of the Florida Department of Health and Rehabilitative Services is the principal source of vital statistics data for Florida and its counties. Data are released on a monthly basis and later accumulated in an annual report, Florida Vital Statistics.

The National Center for Health Statistics in the NCHS Monthly Vital Statistics Report provides national and occasionally state vital statistics data. Also, the Statistical Abstract of the United States includes national and state information on vital statistics and health.

Morbidity statistics are available from the Health Program Office, Florida Department of Health and Rehabilitative Services. Many notifiable diseases are incompletely reported; the degree of underreporting is unknown.

The Division of Mental Health of the Florida Department of Health and Rehabilitative Services publishes each year the Statistical Report of Hospitals, containing information on admissions, discharges, and types of illnesses.

Health, United States is an annual publication of the U.S. Public Health Service and contains national information on health status and determinants, utilization of health resources, and health care resources and expenditure. Regional and state data for some items are included.

SECTION 4.00. EDUCATION

SOURCES: The principal sources of the basic information on education in Florida include Profiles of Florida School Districts, which is the annual report of the State Commissioner of Education, reports from the Management Information Services (MIS) of the Division of Public Schools, and other publications of the Florida Department of Education.

Enrollment information about the State University System is available in the Fact Book, published by the Florida Board of Regents. Data on public community colleges come from reports of the Division of Community Colleges of the Florida Department of Education. Private college information is collected by and published in the annual report of the State Board of Independent Colleges and Universities.

Public and private colleges and universities in Florida are also included in the Education Directory, published by the National Center for Education Statistics.

The Census of Population taken once every ten years also provides information about education, such as school enrollment and educational attainment.

Data on the extent of public education, the level achieved by the pupils, and the availability and enrollments of schools, colleges, and universities are included in Section 4.00. Employment and finances of educational institutions and data on educational services are in Section 20.00, Health, Education, and Cultural Services. Additional information on the public funding of education is in Section 23.00.

SECTION 5.00. INCOME AND WEALTH

EXPLANATORY NOTES. The earnings components of personal income are allocated on a place-of-work basis. These earnings are converted to a place-of-residence basis by means of a residence adjustment factor. Property income and transfer payments are then added to earnings, resulting in total income on a place-of-residence basis. This conversion is illustrated on Table 5.14. The first basis, earnings by place-of-work, is useful in the analysis of the income structure of a given area in terms of industrial markets and purchasing power. Expressed on a per capita basis, the latter basis, earnings by place-of-residence, is an indicator of living standards and welfare level. The population estimates on which the per capita amounts are based are those of the U.S. Bureau of the Census and are not the estimates shown in the population section of this publication. See Section 9.00 for estimates of farm income.

Families and unrelated individuals are classified as being above or below the poverty level by comparing their calendar year income to an income cutoff or "poverty threshold." The income cutoffs vary by family size, number of children, and age of the family householder or unrelated individual. Poverty status is determined for all families (and, by implication, all family members). Poverty status is also determined for persons not in families, except for inmates of institutions, members of the armed forces living in barracks, college students living in dormitories, and unrelated individuals under 15 years old. The 1980 Census definition of poverty reflects revisions recommended by a federal interagency committee in 1979 to a definition adopted in 1969. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index. The poverty threshold for a family of four with two related children under 18 in 1979 was $7,356. The threshold for a one-person unit (unrelated individual) aged 65 and older was $3,479. For a two-person family with householder aged 65 and older the threshold was $4,389. Poverty thresholds are computed on a national basis only. No attempt has been made to adjust these thresholds for regional, state, or other local variations in the cost of living.

SOURCES. The source for statistics on personal income in Florida is the U.S. Department of Commerce, Bureau of Economic Analysis (BEA). The BEA has made comprehensive estimates of personal income, by type and industrial source, covering all economic areas and metropolitan statistical areas (MSAs) and counties in the nation for selected years from 1929 through 1982. Estimates for 1975-82 are published in a ten-volume series, Local Area Personal Income.

Income data for 1979, from the 1980 Census of Population appears on Table 5.50. Annual national estimates of money income are published by the U.S. Bureau of the Census in Current Population Reports, Series P-60. (See Table 5.47.)

Updated estimates of national poverty thresholds are published based on data from the U.S. Census Current Population Reports, Series P-60. (See Tables 5.46 and 5.49.) The U.S. Bureau of Labor Statistics (BLS) developed the income levels for defining poverty for the Comprehensive Employment and Training Act (CETA) program.

One record of income is the annual reports of the U.S. Internal Revenue Service. Data this year show sources, deductions, tax credits, and distribution of income by income class. These come from Statistics of Income: Individual Income Tax Returns. Three other series of the Statistics of Income series provide additional measures of income and wealth: Partnerships, Sole Proprietorships, and Private Foundations.

SECTION 6.00. LABOR FORCE, EMPLOYMENT, AND EARNINGS

EXPLANATORY NOTES. Tables of "covered employment" and payroll are presented in this section and in other sections of this Abstract devoted to individual industries and nonprofit organizations. Any firm or nonprofit establishment whose employees are covered by state and federal unemployment laws must submit monthly reports on the number of persons on its payroll and the amount they were paid so that the appropriate tax can be computed and collected. The data this generates provide useful measurements of the impact of various kinds of industries, firms, or other organizations on the economies of the state and counties. The Bureau of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security compiles these statistics. In these reports the number of reporting units is the average for the quarter, employment is for the week of the 12th in the specified month, and payroll is for the entire quarter.

"Covered employment" data include approximately 95 percent of employed persons in Florida, but certain workers are specifically excluded from coverage. These are principally railroad and some agricultural, local government, and domestic employees and self-employed workers. Also excluded are most nonprofit organizations with fewer than four employees. Included among the self-employed are such types of persons as insurance or real estate agents and barbers whose remuneration is solely by way of commissions. Beginning with January 1, 1978, coverage of the Florida Unemployment Compensation Law was extended to include: (1) employees of agricultural establishments in SIC industries 01, 02, and 07 that meet minimum employment and payroll standards; (2) employees of nonprofit schools, SIC industry code 821; (3) domestic workers for employees reporting payrolls of at least $1,000 a quarter, SIC code 881; and, (4) public service employees whose positions are funded through contract with CETA (Comprehensive Employment and Training Act) prime sponsors. These would be mostly in SIC codes 80, 82, 83, 86, and 91.

Also missing from the tables are data for the state or counties in which there were no firms or so few units that the information for an individual establishment might be made public or estimated by competitors. In these instances and when one firm in a specific category or county has 80 percent of the employment of all the business in that category or county, ranges have been substituted for total amounts to avoid disclosure but give some idea of the magnitudes involved.

The derivation and meaning of SIC codes are briefly discussed in the preface of this Abstract and a listing of major categories and codes are included in the Glossary under "Industrial Classification System, Standard." Table 6.21 presents data for all covered employees by industry and Tables 6.22 and 6.23 by county. Tables in various sections present state and county data by industries, such as Tables 12.50, 12.52, 13.36, 13.37, etc.

Detailed employment data for governments appears in Section 23.00.

Sources. The basis of statistics on the employment status of the population is a monthly Current Population Survey conducted by the U.S. Bureau of the Census. The Bureau of Research and Analysis, Division of Employment Security, Department of Labor and Employment Security of the State of Florida has the responsibility of preparing estimates of employment status following procedures developed in cooperation with the U.S. Bureau of Labor Statistics. In tables dealing with employment and payroll, ranges have been substituted for some of the total amounts in order to avoid disclosure of information about individual establishments. The Burea of Research and Analysis publishes information about Florida in Florida Employment Statistics and about metropolitan statistical areas in Labor Market Trends; special releases are issued on small counties. Different samples are used to prepare these sets of employment and unemployment estimates. A special report prepared for the Florida Occupational Information System is available giving Florida Occupational Demand, 1980-1990.

The Annual Report of the Florida Commission on Human Relations gives information about complaints of employment discrimination.

The U.S. Bureau of Labor Statistics compiles statistics and publishes data on nonagricultural employment in Florida and its metropolitan statistical areas (MSAs). Its publications include Employment and Earnings: States and Areas, Geographic

Profile of Employment and Unemployment, monthly and annual surveys of Work Stoppages, Directory of National Unions and Employee Associations, and the Handbook of Labor Statistics. It also publishes a series of bulletins under the title News, each of which contains data on a topic of interest related to employment, such as union membership and average annual pay.

The decennial Census of Population also provides much employment information. Metropolitan commuting flow data from the 1980 Census and issued by the Bureau of Census in subject report 1980 Census of Population: Journey of Work, Metropolitan Commuting Florida (PC80-2-6C), is contained in Table 6.45.

Data on federal employees in Florida come from the annual report of the Office of Personnel Management of the U.S. Civil Service Commission. The Employment and Training Report of the President is the source of information on enrollments under the Comprehensive Employment and Training Act and also contains much other employment data.

Statistics on seasonal agricultural employment are available from the Florida Department of Labor and Employment Security, Bureau of Research and Analysis. The U.S. Bureau of Economic Analysis provides data on farm proprietors and wage and salary workers. These data appear in Section 9.00.

Printouts of county employment and payroll data by industry for March of each year from 1976 through 1982 are available from the Bureau of Economic and Business Research, University of Florida. (Write for cost and ordering information.)

Another source of data on employment by county and industry, County Business Patterns, is published each year by the U.S. Bureau of the Census. It provides information on employment by SIC code in the state and counties of Florida.

SECTION 7.00. SOCIAL INSURANCE AND WELFARE

EXPLANATORY NOTES. For purposes of managing state-administered public assistance programs, the state has been divided into 11 Health and Rehabilitative Services districts; a map showing these districts appears in this section.

SOURCES. The source of statistics on Social Security programs is the U.S. Department of Health and Human Services, Social Security Administration in the Social Security Bulletin, published monthly with an annual statistical supplement and in the release of unpublished data.

The U.S. Department of Health and Human Services, Social Security Administration publishes data on state programs. Data on workmen's compensation programs are published periodically in the Social Security Bulletin.

The Health Care Financing Administration in the U.S. Department of Health and Human Services publishes data on medicare and medicaid programs in the Medicare Annual Report and also makes available unpublished data.

Four public assistance programs--for the aged, the blind, the permanently and totally disabled, and dependent children--are administered by the state but are financed in part by the federal government in grants to states under the Social Security Act. The principal source of state and national data on these programs is the U.S. Department of Health and Human Services. The principal source of data on Florida and Florida's counties is the Florida Department of Health and Rehabilitative Services, Annual Statistical Report. Information about state assistance is also reported in the Annual Report of the Comptroller.

The Division of Unemployment Insurance of the Florida Department of Labor and Employment Security has published a report entitled Historical Series of Unemployment Insurance, 1937-79 and can supplement it with unpublished data.

SECTION 8.00. GEOGRAPHY AND CLIMATE

SOURCES. Tables in this section which contain information relating to temperature, precipitation, and other climatological phenomena are based on data supplied by the Environmental Data and Information Service of the National Oceanic and Atmospheric Administration, U.S. Department of Commerce. Their publications are issued both annually and monthly under the title, Climatological Data, Florida. The Statistical Abstract of the United States provides information to compare the climate of various Florida cities with the climate of other cities in the United States.

The 1980 Census of Population report Number of Inhabitants, Florida (PC80-1-A11) provides updated information on the area of the state and counties of Florida.

The American Gas Association includes figures on heating and cooling degree days by the state in the annual editions of Gas Facts.

Information pertaining to the ownership of land in Florida by the federal government comes by the Bureau of Land Management of the U.S. Department of the Interior in Public Land Statistics.

The Bureau of Air Quality Management, Florida Department of Environmental Regulation provides information on air pollution in Ambient Air Quality in Florida.

SECTION 9.00. AGRICULTURE

EXPLANATORY NOTES. A Census of Agriculture was first taken in 1840 and has been taken every five years. Congress authorized Agricultural Censuses to be taken in 1978 and 1982 to coincide with the quinquennial Economic Censuses. After 1982, the Agricultural Census reverted to a five-year cycle to be taken in years ending in "2" and "7." From the 1982 Census, data dealing with the characteristics of farms and farm operators are presented in this section. An index at the back of this book lists census tables appearing in previous Abstracts. As defined for the 1982 and 1978 censuses, a farm is "any place from which $1,000 or more of agricultural products were sold or normally would have been sold during the census year." Because data for selected items are collected from a sample of operators, the results are subject to sampling variability. Because of changes in reporting procedures, data for 1978 have been adjusted to be comparable with 1982 data. However, dollar values have not been adjusted for changes in price levels between census years.

When comparisons are made between Florida and other states, the other states selected either have a similar climate (the southern tier of sunbelt states) or produce similar crops (citrus in Arizona and California, sugarcane in Hawaii and Louisiana, eggs in Alabama and Mississippi, etc.).

SOURCES. Agricultural employment information comes from the Bureau of Economic Analysis, U.S. Department of Commerce and from the Bureau of Research and Analysis, Division of Employment Security, Florida Department of Labor and Employment Security.

Timely and detailed data on farm receipts, income, production, and value of farm marketings are provided in tables based on annual publications of the U.S. Department of Agriculture, Agricultural Outlook, Agricultural Statistics, Economic Indicators of the Farm Sector: State Income and Balance Sheet Statistics, and other publications. Some data on farm income are presented in Section 5.00 with income data from other sources.

Expanded coverage of the Florida Unemployment Compensation Law beginning in 1978 has permitted the Florida Department of Labor and Employment Security to supply more comprehensive data on establishments, employees, and payroll of agricultural establishments, SIC codes 01, 02, and 07, that meet minimum employment and payroll standards.

Information about citrus production, other crop cultivation, and consumption of fertilizers is from the Florida Crop and Livestock Reporting Service, Florida Department of Agriculture and Consumer Services. The Florida Department of Citrus provides information on orange juice sales.

The U.S. Department of Agriculture, Agriculture and Stabilization Service provides information on government payments and also makes estimates of the number of farms. This agency also collects reports on nonresident alien ownership of agricultural land and has provided state and county estimates for a report published by the Florida Legislature. The U.S. Department of Agriculture, Economics, Statistics, and Cooperatives Service has issued a report which gives state information: Foreign Ownership of U.S. Agricultural Land.

SECTION 10.00. FORESTRY, FISHERIES, AND MINERALS

SOURCES. The American Forest Institute provides data on tree farms. Forestry employment and payroll data come from the Florida Department of Labor and Employment Security, as does similar information for fisheries and mining. (See discussion under Section 6.00 in this Appendix.) Acreage devoted to commercial forests by county is estimated by the Forest Service of the U.S. Department of Agriculture. The Division of Forestry of the Florida Department of Agriculture and Consumer Services has estimated county income from forest products.

The National Marine Fisheries Service of the U.S. Department of Commerce provides data on fish landings and fishery products, plants, and cooperatives. Data on fish kills are provided by the U.S. Environmental Protection Agency. Table 19.45 in Section 19.00 gives information on the number of commercial boats registered in the state and counties of Florida.

Basic data on the production of minerals are from preprints of the Minerals Yearbook and specific industry reports of the Bureau of Mines of the U.S. Department of Interior. Every five years the U.S. Bureau of the Census conducts an Economic Census which includes a Census of Mineral Industries. Table 10.73 contains data from the 1982 Census of Mineral Industries and an index at the back of this book lists Census tables appearing in previous Abstracts.

Land Areas of the National Forest System comes from the U.S. Department of Agriculture, Forest Service.

SECTION 11.00. CONSTRUCTION

SOURCES. In this section are statistics on building construction activity and characteristics of that industry (SIC codes 15-17). The principal source of construction data for Florida is the Bureau of Economic and Business Research (BEBR), University of Florida. The BEBR publishes monthly and annual summaries on the type and value of building permits for construction issued by administrative offices in each of approximately 430 places in Florida, in Building Permit Activity in Florida. The BEBR prepares projections of housing starts for Florida and its major metropolitan areas and makes them available exclusively to subscribers of The Florida Outlook.

Additional sources of data on construction in the various states are reports available from F.W. Dodge Company, a division of McGraw-Hill, Inc.; the Construction Review, published monthly by the Bureau of Industrial Economics of the U.S. Department of Commerce; and Construction Reports: Value of New Construction Put in Place (and other topics), published by the U.S. Bureau of the Census. The Census Bureau also publishes Housing Units Authorized by Building Permits and Public Contracts; in addition to building permit data, this publication provides monthly and annual information on shipments of mobile homes.

Every five years the U.S. Bureau of the Census conducts a Economic Census, one part of which is the census of Construction Industries, which includes such items as receipts, employment, payroll, and value added. Tables 11.65 and 11.72 present data from the 1982 Census of Construction Industries.

Data on employment and payrolls are supplied by the Florida Department of Labor and Employment Security. (See discussion under Section 6.00 of this Appendix.)

SECTION 12.00. MANUFACTURING

SOURCES. Major industry divisions for manufacturing comprise SIC codes 20-39. Data on the number of units, number of employees, and payroll for these establishments were obtained from the Bureau of Research and Analysis, Division of Employment Security of the Florida Department of Labor and Employment Security. A number of additional industries are detailed, including county breakdowns.

The U.S. Bureau of the Census conducts a complete count of manufactures every five years as part of its comprehensive Economic Census. The Bureau of the Census also conducts a sample survey in intervening years. The sample survey is called the Annual Survey of Manufactures. The annual survey program also provides information on employment related to the export of manufactured goods.

Another source of such information is the Annual Survey of Industrial Purchasing Power, published by Sales and Marketing Management, 633 Third Avenue, New York, New York 10017.

A publication of the Division of Economic Development of the Florida Department of Commerce called Florida Facts is the source of a list of the larger manufacturers in the state.

SECTION 13.00. TRANSPORTATION

SOURCES. The U.S. Department of Transportation provides data on roads and highways, tax receipts, and vehicles in Highway Statistics, a publication of the Federal Highway Administration, U.S. Department of Transportation. The same agency publishes annually a report entitled Fatal and Injury Accident Rates on Federal-Aid and Other Highway Systems. Information about licenses and drivers of motor vehicles comes from the Florida Department of Highway Safety and Motor Vehicles. The same source publishes Traffic Accident Facts.

Every five years the Bureau of the Census conducts an Economic Census which includes a Census of Transportation. Survey data on characteristics and use of trucks is published under the title Truck Inventory and Use Survey. Table 13.01 presents data from this 1982 survey. An index at the back of the book lists tables appearing in previous editions of Abstract. The 1980 Census of Population provides data on means of transportation to work.

The principal sources of information about railroads (SIC code 40) are the Public Service Commission of the State of Florida, the Yearbook of American Railroad Facts, published by the Association of American Railroads, and the Florida Department of Revenue, which supplies data on the value of rights-of-way.

Employment and payroll figures for all modes of transportation except railroads are supplied by the Florida Department of Labor and Employment Security. Railroads are not included because their employees are not covered by the same unemployment law as workers in other industries.

Water transportation (SIC code 44) includes both the movement of vessels through Florida waterways and the volume of commodities shipped into and out of Florida ports. The authorities of the various ports in the state have supplied data on their activities. The volume of waterborne exports and imports is supplied by the U.S. Bureau of the Census in U.S. Waterborne Exports and General Imports.

Air transportation (SIC code 45) is represented by data showing exports and imports obtained from U.S. Airborne Exports and General Imports, published by the U.S. Bureau of the Census. Air traffic information comes from two sources developed by the Federal Aviation Administration of the U.S. Department of Transportation: FAA Air Traffic Activity and Airport Activity Statistics of Certified Route Air Carriers.

SECTION 14.00. COMMUNICATIONS

EXPLANATORY NOTES. Newspaper publishing and other print media (SIC code 27) are considered to be manufacturing by the U.S. Bureau of the Census as well as the Office of Management and Budget, which establishes the Standard Industrial Classification. But since newspapers, periodicals, and books compete with electronic media in providing communications, data are repeated in this section. Table 12.50 in Section 12.00 shows newspapers as a component of the manufacturing industry.

SOURCES. Also included in Section 14.00 are data on the U.S. Postal Service (SIC code 43), supplied by its southern regional headquarters in Memphis, telephones (SIC code 481), telegraph (SIC code 482), and radio and television broadcasting (SIC code 483). The Florida Public Service Commission supplies data on telephone companies in Florida. Employment and payroll data are from the Florida Department of Labor and Employment Security, Division of Employment Security, Bureau of Research and Analysis. (See discussion under Section 6.00 of this Appendix.)

A copyrighted source has been used with permission for newspaper circulation: Editor and Publisher International Yearbook. This yearbook provides detailed information for individual daily, weekly, and special audience newspapers.

SECTION 15.00. POWER AND ENERGY

SOURCES. Data in this section have been selected to describe the status of the electric, gas, and sanitary service industries, and the consumption of electricity, gas, gasoline, and fuel oil. Energy information is supplied by the Energy Information Administration, U.S. Department of Energy in State Energy Price Expenditure Report, Electric Power Annual, and Natural Gas Annual.

A major source of data on electrical energy in Florida is Statistics of the Florida Electric Utility Industry, published by the Florida Public Service Commission. The Governor's Energy Office issues Florida Energy Data and Florida Motor Gasoline Consumption. The Florida Electric Power Coordinating Group issues annually a Ten Year Plan: Electrical Generating Facilities, Demand and Energy, Fuels, and Transmission Lines.

The Division of Employment Security of the State Department of Labor and Employment Security supplies information on employment and payroll in the utility industry. (See discussion under Section 6.00 of this Appendix.)

The Public Service Commission of Florida also supplies data on typical gas bills, generating capacity, and average consumption of electricity. Typical electric bill information comes from the U.S. Federal Power Commission.

Consumption of motor fuel data are obtained from the publication Highway Statistics of the Federal Highway Administration, the Florida Department of Revenue, and the Annual Report of the Comptroller, State of Florida.

Additional information on the reserves and production of natural gas and petroleum are in Section 10.00. Information on consumer prices of energy, as measured by the Consumer Price Index, is reported in Section 24.00.

SECTION 16.00. WHOLESALE TRADE

EXPLANATORY NOTES. Data from the 1982 Census of Wholesale and Retail Trade is contained herein. Detailed tables of information from the 1977 Census of Wholesale and Retail Trade and which are considered to be of a benchmark nature were included in the 1980 Florida Statistical Abstract. An index of Census tables appearing in previous Abstracts is at the back of this edition. Number of establishments, employment, payroll, and sales are analyzed both by kind of business and by geographical areas in which the establishments are located such as counties, municipalities, and metropolitan statistical areas.

SOURCES. Covered employment and payroll information by kind of business and county come from the Bureau of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security. (See the discussion under Section 6.00 of this Appendix.) Since there are some differences in coverage and classification, these figures are not necessarily comparable with those from the economic censuses.

The Florida Department of Revenue is the source for information on sales reported by firms in connection with the sales and use tax laws. In addition to the tables presented in this section, printouts of county gross and taxable sales by business category are available from the Bureau of Economic and Business Research on a subscription basis. These also vary in coverage and classification from either the census or the Florida Department of Commerce figures. Data on retail sales tax collections may be found on Table 23.43. A time series of gross and taxable sales is to be found on Table 24.30.

Professional persons who operate at the retail level and are required to have a license such as dispensing opticians or pharmacists are kept track of and reported by the Florida Department of Professional Regulation. These data are reported in Section 20.00.

The Bureau of the Census conducts an Economic Census every five years. The Census of Wholesale and Retail Trade is part of this quinquennial census. The Bureau of the Census also publishes Current Business Reports which contain sales and other data.

SECTION 17.00. FINANCE, INSURANCE, AND REAL ESTATE

EXPLANATORY NOTES. Industries covered in this section are those SIC codes numbered 60 through 67, including banking and other credit agencies, establishments dealing in securities and commodities, insurance and real estate offices, and holdings and investment firms.

Banks in Florida are organized under both Florida law and federal law. State-chartered banks are supervised by the Comptroller of the State of Florida and national banks, organized under federal law, are supervised by the Comptroller of the Currency of the United States.

SOURCES. Summaries of banking data for Florida may be found in the *Annual Report of the Florida Division of Banking*, published by the Comptroller's *Office.* Another major source of banking data is the the Federal Deposit Insurance Corporation, which issues an *Annual Report*, *Statistics on Banking*, and *Banks and Branches Data Book*. The figures on number of units, employment, and payroll come from the Florida Department of Labor and Employment Security, Division of Employment Security. (See the discussion in Section 6.00 of this Appendix.)

Sources of information on savings and loan associations include the *Annual Report* and monthly *Trends*, published by the Florida Savings and Loan League; the *Savings and Loan Sourcebook*, published by the U.S. League of Savings Associations; and the *FSLIC-Insured Institutions: Summary of Savings Accounts by Geographic Area* and *Savings and Home Financing Source Book*, both issued by the Federal Home Loan Bank Board. The Federal Home Loan Bank Board has also provided unpublished mortgage activity for loans made for single-family houses by savings and loan associations, mortgage bankers, commercial banks, and mutual savings banks.

The Florida Credit Union League and the *Annual Report of the Division of Banking* are sources of data on credit unions.

A basic source of information on activities on insurance companies in Florida is the *Annual Report* of the Florida Department of Insurance, Office of State Treasurer and Insurance Commissioner. A source of information on the United States and for individual states is *Insurance Facts*, published by the Insurance Information Institute. Data on health insurance are from the Health Insurance Institute, *Source Book of Health Insurance Data*.

Information on professional persons who handle real estate transactions and are required to have a license is reported by the Florida Department of Professional Regulation.

SECTION 18.00. PERSONAL AND BUSINESS SERVICES

EXPLANATORY NOTES. The Standard Industrial Classification System lists services from SIC code 70 to SIC code 89. In this section tables based on the establishments covered by the unemployment insurance law cover personal services (SIC code 72), business services (SIC code 73), auto repair services and garages (SIC code 75), miscellaneous repair services (SIC code 76), and services not elsewhere classified (SIC code 89). Information about establishments with other service SIC codes are to be found in Sections 19.00, 20.00, and 22.00.

The United States Bureau of the Census has taken a census of service industries as part of the Economic Census every five years since 1967. In 1977, coverage of service industries broadened from "selected services" to "all services except religious organizations and private households." Establishments covered in the census are classified from SIC code 70 to SIC code 79, SIC code 8072, SIC code 81, and SIC code 891. Detailed information from the *1977 Census of Service Industries* was published in the *1980 Florida Statistical Abstract*. An index of Census tables appearing in previous *Abstracts* is at the back of this edition.

Data from the 1982 Census of Service Industries are not used for any tables in this *Abstract* because the data for all service establishments were not available since the 1982 Census of Service Industries lacks data for establishments without payroll. Data for these businesses were extracted from the Internal Revenue Service (IRS) From 1040, Schedule C. The Census Bureau reports in its 1982 Census of Service Industries publications that these data could not be published because the IRS miscoded many businesses into miscellaneous categories rather than classifying the businesses as a specific kind of establishment.

SOURCES. Data on establishments, employment, and payroll of service establishments whose employees are covered by the unemployment insurance law are provided by the Division of Employment Security of the Florida Department of Labor and Employment Security. (See the discussion under Section 6.00 of this Appendix.) Data for the same area and industry from the Census of Service Industries are not necessarily comparable because of differences in procedures, definitions, and establishments covered.

Many service establishments are operated by professional individuals who are licensed by the state. Data on the holders of such licenses have been supplied by the Florida Department of Professional Regulation.

Information on health, educational, and cultural services is reported in Section 20.00.

SECTION 19.00. TOURISM AND RECREATION

SOURCES. Information collected for the 1977 Census of Transportation: Travel During 1977 was published in the 1980 Florida Statistical Abstract. An index of Census tables appearing in previous Abstracts appears at the back of this book. Data from the 1982 Census of Transportation are found in Section 13.00.

Data on employment in tourist and recreation-related industries come from the Bureau of Research and Analysis, Division of Employment Security, Florida Department of Labor and Employment Security. (See discussion under Section 6.00 of this Appendix.)

The Division of Tourism of the Florida Department of Commerce issues quarterly and county reports of tourist information and an annual report, Florida Visitor Study: An Executive Summary. It also supplies the unpublished results of a survey of Florida's top festivals and events. Tourist facilities include hotels, motels, and food service establishments which are regulated by the Division of Hotels and Restaurants of the Florida Department of Business Regulation. The Florida Revenue Department provides information on the sales of tourist-related businesses. Some of these data are in Section 16.00 and are repeated here. The Department of Revenue also provides information on the tourist-development or local option tax collected in 13 counties.

Data on boats registered by county in Florida are provided by the Department of Natural Resources, Division of Recreation and Parks. This agency also issues information on the nature, size, and popularity of state parks. Data on national parks in Florida were abstracted from the National Park Statistical Abstract, published by the National Park Service of the U.S. Department of the Interior.

The Florida Department of Natural Resources has issued Outdoor Recreation in Florida, an inventory of recreation resources and facilities. Regional information and projections of need for 1985 and 1990 are included in the source.

The Division of Transportation Planning of the Florida Department of Transporation records traffic counts at strategic highway locations around the state. Estimates of the number of tourists entering Florida by automobile are made by the Florida Division of Tourism using these traffic counts and information from welcome stations. Tourist arrivals by air are based on arrivals at major airports. Estimates utilize a tourist base established in 1973 and updated annually. Individual visitors are interviewed on a randomly selected basis about expenditures and length of stay. Sample results are expanded to the total visitor population.

SECTION 20.00. HEALTH, EDUCATION, AND CULTURAL SERVICES

SOURCES. Data on employment are from the covered employment and payroll figures supplied by the Bureau of Research and Analysis, Division of Employment Security of the Florida Department of Labor and Employment Security. (See discussion under Section 6.00 of this Appendix.)

Information on physicians, dentists, nurses, opticians, pharmacists, and other licensed health service practitioners and professionals comes from the Department of Professional Regulation, State of Florida.

Bed capacity of licensed hospitals and nursing homes is reported by the Office of Licensure and Certification in the Florida Department of Health and Rehabilitative Services.

Health, United States is an annual publication of the U.S. Public Health Service and contains national and some regional and state data on health facilities and services.

Educational establishment information comes from the Florida Department of Education: the annual report of the Commissioner of Education, Profiles of Florida School Districts; the Division of Community Colleges of the Florida Department of Education, Report for Florida Community Colleges; the Division of Public Schools, MIS Statistical Briefs and MIS Statistical Reports; State Board of Independent Colleges and Universities, Annual Report; and the National Center for Educational Statistics of the U.S. Department of Education.

Library information is supplied by the Division of Library Services of the Florida Department of State in Florida Library Directory with Statistics.

Data on veterans hospitals comes from the U.S. Veterans Administration, Annual Report.

SECTION 21.00. GOVERNMENT AND ELECTIONS

SOURCES. Since 1957, every five years the U.S. Bureau of the Census conducts a Census of Governments. The Census of Governments covers four major subject areas: governmental organization, taxable property values, public employment, and governmental finances. Table 21.01 presents information about governmental units by type in Florida and the United States from the 1982 Census. Tables 21.06 and 21.07 are included from the 1982 Census to show numbers of local governmental units in Florida by county, by MSA, and by type. An index of Census tables appearing in previous Abstracts is at the back of this edition.

The Division of Elections in the Florida Department of State provides information on registered voters and numbers of votes cast. This year the data refer to the general elections of 1980 and 1982. Current figures on voting-age population are released annually by the Bureau of Economic and Business Research (BEBR), University of Florida.

SECTION 22.00. COURTS AND LAW ENFORCEMENT

EXPLANATORY NOTES. Data on criminal offenses are subject to certain limitations. Many crimes are not reported to law enforcement agencies and hence are not counted in preparing crime statistics. Victims may report crimes to prosecuting authorities rather than to law enforcement agencies or for various reasons may not report at all.

Offenses included on most of the tables in this section include murder, manslaughter, rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft. Not included in these statistics are arson, forgery, fraud, embezzlement, prostitution, narcotic and drug violations, gambling, etc., although some of these latter offenses are included on Table 22.04.

An additional factor to consider when studying crime rates in Florida is the presence of large numbers of tourists. The crime rates in this section are based on resident population. When adjustments are made for the tourist presence, the crime rate in Florida for 1984 drops from 6,855 per 100,000 persons to 6,134 per 100,000 persons. Crime in Florida gives modified crime rates for all Florida counties.

SOURCES. The principal source of data on crimes and criminals in Florida is the annual report of the State Department of Criminal Law Enforcement, Crime in Florida. For the purposes of crime statistics the Florida population has been grouped into five community types: metropolitan (cities over 250,000 population), cities (cities of 50,000 to 250,000 population), suburban (cities under 50,000 population and unincorporated jurisdictions in metropolitan counties), nonsuburban (cities under 50,000 population in nonmetropolitan counties), and rural (unincorporated areas in nonmetropolitan counties). See the introduction to Section 1.00 for a discussion of metropolitan areas in Florida. Table 22.07 presents information for these community types.

Other sources on the criminal justice system include publications of two divisions of the U.S. Department of Justice: Crime in the United States, by the Federal Bureau of Investigation; and Bureau of Justice Statistics Bulletins: Prisoners and Death Row Prisoners by the Bureau of Justice Statistics.

Data on legal services come from the Florida Bar and the Florida Division of Employment Security, Bureau of Research and Analysis.

Prison and prisoner information is made available by the Federal Bureau of Prisons of the U.S. Department of Justice in its Statistical Report and the Florida Department of Corrections, Annual Report.

SECTION 23.00. GOVERNMENT FINANCE AND EMPLOYMENT

EXPLANATORY NOTES. A number of tables in the Health, Education, and Cultural Services Section (20.00) contain data on property valuations, revenue, expenditure, and taxes for education by public agencies. Table 19.54 in Section 19.00 provides figures on the tourist development/local option tax collected by 13 counties. Table 19.70 provides information about tax collections from tourist-related businesses.

Although the official records of the Comptroller are used by the Bureau of the Census in its compilations on state and local government finances; however, the Bureau of the Census has found it necessary at times to classify and present the government financial statistics in terms of its own system of uniform concepts and categories rather than according to the diverse terminology and structure of individual governments. This procedure explains the differences which may be found between similar data from the two sources.

SOURCES. The U.S. Bureau of the Census publishes a number of individual reports, including State Government Finances, City Government Finances, Public Employment, Finances of Employee-Retirement Systems, Labor-Management Relations in State and Local Governments, and Governmental Finances and Employment. The Bureau of the Census also has published Local Government in Selected Metropolitan Areas and Large Counties, and Environmental Quality Control. Basic data from the 1977 Census of Governments relating to finance and employment will be found in the 1979 and 1980 editions of the Florida Statistical Abstract. This edition contains data from the 1982 Census of Governments. An index of tables in previous

Abstracts appears at the end of this book. The U.S. Bureau of the Census releases Federal Expenditure by State.

Official records and reports of the Comptroller of the State of Florida form the basic source of information about government finances in Florida and are published in the Annual Report of the Comptroller. Other State of Florida sources of data on government finances and employment include the Department of Revenue, Florida Ad Valorem Valuations and Tax Data; the Department of Business Regulation, for data on pari-mutuel wagering and beverage licenses; The Report of the State Treasurer; the Division of Employment Security on employment and payroll; and the Division of Retirement, Annual Report. A number of tables use as a source Local Government Financial Report put out by the Florida Department of Banking and Finance.

A non-profit organization, Tax Foundation, Inc., publishes a monthly newsletter Tax Features which presents information on federal and state taxes.

SECTION 24.00. ECONOMIC INDICATORS AND PRICES

EXPLANATORY NOTES. Most of the tables in the Abstract are cross-sectional or "snapshot" portrayals of the situation existing at any one time. Many readers are interested in charting trends over time. This section should help them.

Consumer price indexes are the work of the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor and appear in the monthly CPI Detailed Report, Monthly Labor Review, the annual Handbook of Labor Statistics, and in the U.S. Department of Commerce monthly publication Survey of Current Business. The BLS publishes two indexes: one reflecting the buying habits of all urban households (CPI-U) and one reflecting the buying habits of urban wage earners and clerical workers (CPI-W). Both indexes are comparable with historical CPI figures; the index for all urban households is used in tables in this section (except for the entry of the CPI-W index on Table 24.72). It is based on information reflecting the buying habits of about 80 percent of the U.S. population and represents all urban residents, including professional workers, the self-employed, the poor, the unemployed, and retired persons. Not included are persons living outside urban areas, farm families, persons in military services, and those in institutions. The Bureau of Labor Statistics issues a quarterly CPI for Miami. (See Table 24.73.)

The series of producer prices appears on Tables 24.70 and 24.74. According to the U.S. Bureau of Labor Statistics, this series measures the average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. The sample used for calculating the indexes contains nearly 2,800 commodities and about 10,000 quotations selected to represent the movement of prices of all commodities produced in the agriculture, forestry, fishing, mining, manufacturing, gas, electricity, and all public utility sectors.

Data on price trends in construction are in Section 11.00. Section 15.00 contains additional information on energy prices.

SOURCES. The basic series of economic indicators for Florida is kept on the BEBR Data Base, Bureau of Economic and Business Research, University of Florida. Three of these series appear on Table 24.12.

Data on sales and use tax collections result from the operation of the Department of Revenue of the State of Florida. A source of banking data is the State of Florida, Division of Banking.

Price level indexes for the counties of Florida are prepared and released by the state Governor's Office and are published in Florida Price Level Index.

SECTION 25.00. QUALITY OF LIFE

EXPLANATORY NOTES. The quality of life is a highly abstract concept that cannot be measured directly. However, by defining those factors that determine the quality of life and measuring the corresponding social indicators, comparisons of the quality of life in different places may be made. Furthermore, by updating these measures from time to time, progress or regress in the conditions of living in one area may be computed.

Traditionally, it has been assumed that the only sound indicators of any value were such measures of economic progress as gross national product or personal income. But in today's highly complex society there are many characteristics of the environment that the affluent can change no more easily than those with fewer financial resources. A list of both economic and noneconomic factors that most people would accept as representing determinants of the quality of life can be classified by such broad categories as community living conditions and economic, public, educational and cultural, and natural environments. Within these sections specific indicators are grouped into such divisions as population, housing, health, education, income, employment, welfare, climate, public safety, governmental expenditure, etc.

On Table 25.01 indicators were selected to permit the reader to compare the quality of life in Florida with that in other states in the Sunbelt and with other populous states in other sections of the country.

SOURCES. Those interested in comparing Florida with all fifty states or in determining how Florida's metropolitan areas fit into the national picture are referred to the following publications: (1) Federal Statistical System and U.S. Bureau of the Census, Social Indicators, III (1980); (2) U.S. Environmental Protection Agency, Washington Environmental Research Center, Quality of Life Indicators in U.S. Metropolitan Areas, 1970; (3) Ben-Chieh Liu, The Quality of Life in the United States, 1970; and (4) Quality of Life Indicators in the U.S. Metropolitan Areas, 1970. Item 1 is obtainable from the U.S. Government Printing Office; item 2 from the source indicated; and, items 3 and 4 from the Midwest Research Institute, 425 Volker Boulevard, Kansas City, Missouri 64110.

SUMMARY OF SOURCES

STATE SOURCES. Most of the state publications are available free of charge from the agency which issues the report. Supplies are frequently limited and sometimes requests cannot be honored unless they come from other state agencies. The state has a system of state depository libraries, coordinated by the Division of Library Services, Florida Department of State, R.A. Gray Building, Tallahassee 32304. All state agency publications are supposed to be on file in depository libraries or available for interlibrary loan. The reference departments of most libraries are willing to answer questions about data in these publications if the requests are not too time-consuming. The Florida Division of State Library Services issues a monthly and annual summary of state agency publications called Florida Public Documents.

Depository libraries of the State of Florida include the public libraries of Bay and Broward counties, Cocoa, Jacksonville, Miami Beach, Miami, Ocala, Orlando, St. Petersburg, Tampa, and West Palm Beach. University libraries designated as depositories are those at Florida Atlantic, Florida International, Central Florida, Florida State, Stetson, Jacksonville, Florida (Gainesville), Miami, North Florida, South Florida, and West Florida universities. The library at Miami-Dade Community

College and the State Library of Florida in the R.A. Gray Building in Tallahassee also are depositories.

FEDERAL SOURCES. Some federal reports are available without charge from the agency which issues the information, but most federal publications must be purchased from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402 (phone 202/783-3238) or from a local Government Printing Office bookstore. Publications purchased from the GPO must be paid for in advance. The Statistical Abstract of the United States is similar in purpose to the Florida Statistical Abstract. Readers who are interested in information about the nation, its regions, and states are referred to it.

The federal government also maintains a system of depository libraries in all 50 states, usually the same libraries as state depositories. The University of Florida is designated as a regional depository library and is required to receive and retain one copy of all depository government publications made available to depository libraries either in printed or microfacsimile form.

PRIVATE SOURCES. A number of private agencies and associations issue publications or reports which have been used in this and previous editions of Abstract. Some are copyrighted and have been used with permission. Several have additional information which can be obtained for a fee. The following is a partial list of agencies and addresses:

Certain living arrangements regardless of the number or relationship of the people in the unit such as military barracks, college dormitories, missions and flophouses. All persons not living in households are classified as living in group quarters.

HOUSEHOLD. The person or persons occupying a housing unit.

HOUSEHOLD INCOME. See Income

HOUSEHOLDER. Person, or one of the persons, in whose name the home is owned or rented and who is listed in column one of the census questionnaire. If there is no such person in the household, any adult household member could be designated as "householder."

Family householder is a householder living with one or more persons related to him or her by birth, marriage, or adoption.

Nonfamily householder is a householder living alone or with nonrelatives only.

HOUSING UNIT. A house, an apartment, a group of rooms, or a single room occupied as a separate living quarters, or if vacant, intended for occupancy as a separate living quarters.

Occupied housing unit is that which is the usual place of residence of the person or group of persons living there at the time of the census enumeration, or that from which the occupants are only temporarily absent (away on vacation, etc.).

Owner-occupied housing unit is one in which the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for.

Renter-occupied unit is any unit not classified as owner-occupied, including one rented for cash rent and one occupied without payment of cash rent.

Vacant housing unit is that in which no one is living at the time of census enumeration, unless the occupants are only temporarily absent. May be classified as "seasonal and migratory, or "year-round." Seasonal unit is intended for occupancy during only certain seasons of the year. Migratory unit is held for occupancy for migratory labor employed in farm work during crop season. Year-round vacant unit is available or intended for occupancy at any time of the year.

Year-round housing unit includes occupied and vacant units available or intended for year-round use. Excluded is vacant unit intended for seasonal occupancy and/or held for migratory labor.

INCOME. The sum of amounts reported separately for wage and salary income; nonfarm net self-employment income; farm net self-employment income; interest, dividend, net royalty or rental income; social security or railroad retirement income; public assistance or welfare income; and all other income. Not included are money received from the sale of property; the value of income "in-kind" from food stamps, public housing subsidies, medical care, employer contributions for pensions, etc.; withdrawal of bank deposits; money borrowed; tax refunds; exchanges of money between relatives living in the same household; gifts and lump-sum inheritances, insurance payments, and other types of lump-sum receipts.

Family income is compiled by summing and treating as a single amount the income of all family members aged 15 and over.

Household income includes the income of the householder and all other persons aged 15 and over in the household, whether related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

Interest, dividend, or net rental income includes interest on savings or bonds, dividends from stockholdings or membership in associations, net royalties, and net income from rental of property to others and receipts from boarders or lodgers.

Labor income is an item generally used for various types of supplemental earnings, in cash and in kind.

Mean income is the amount obtained by dividing the total income of a particular statistical universe by the number of units in that universe.

Median income is the amount which divides the income distribution into two equal groups; one having incomes above the median and the other having incomes below the median. For households, families, and unrelated individuals the median income is based on the distribution of the total number of units including those with no income. The median for persons is based on persons with income.

Money income. Same as Income.

Other income includes unemployment compensation, veterans' payments, public or private pensions, alimony or child support, workers' compensation, periodic payments from estates and trust funds, periodic receipts from annuities or insurance, contributions received periodically from persons not living in the household, military family allotments, net gambling winnings, and other kinds of periodic income other than earnings.

Personal income is current income from all sources of persons in an area. Is measured before deduction of personal contributions to social insurance programs and is reported in current dollars. Includes the following categories of earnings: wages and salaries; labor income; proprietors income; property income; and government and business transfer payments.

Property income is net rental income, dividends, and interest.

Proprietors income is net income of owners of unincorporated businesses (farm and nonfarm with the latter including the income of independent professionals).

Public assistance income includes three items: supplementary security income payments made by federal or state welfare agencies to low income persons who are aged (age 65 or over), blind, or disabled; and to families with dependent children; and general assistance. Separate payments received for hospital or other medical care are excluded.

Social security income includes social security pensions and survivors benefits and permanent disability insurance payments made by the Social Security Administration prior to deductions. Medicare reimbursements are not included.

INDUSTRIAL CLASSIFICATION SYSTEM, STANDARD. Industrial Classification System developed and published in 1972 by the Executive Office of the President, Office of Management and Budget, and then revised and published in a supplement to the manual in 1977. Major industries are assigned two-digit SIC codes: 00 through 99; subdivisions are classified by three- and four-digit codes. The major industry groups and their SIC codes are as follows:

- Agriculture (01, 02, 07)
- Forestry and fisheries (08, 09)
- Mining (10-14)
- Construction (15-17)
- Manufacturing (20-39)
  - Durable goods (20-23, 26-31)
  - Nondurable goods (24-25, 32-39)
- Transportation, communications and other public utilities (40-49)
- Wholesale trade (50-51)
- Retail trade (52-59)
- Finance, insurance, real estate (60-67)
- Services (70-89)
- Public administration (91-97)

An example of SIC coding is the construction industy which is divided into major group, SIC 15, "building construction;" group SIC 16, "construction other than building construction;" and group SIC 17, "special trade contractors." Group 15 is in turn divided into group 152--"general building contractors, residential buildings," group 153--"operative builders," and 154--"general building contractors, nonresidential." Finally, group 152 is subdivided into 1521--"general contracts, single-family houses," and 1422--"general contractors, other than single-family."

INMATES OF INSTITUTIONS. See Group quarters.

INTEREST, DIVIDEND, OR NET RENTAL INCOME. See Income.

LABOR FORCE. All persons in the civilian labor force plus persons on active duty with the U.S. Army, Air force, Navy, Marine Corps or Coast Guard.

MANUFACTURED HOUSING. Any prefabricated dwelling such as mobile home or modular housing.

MANUFACTURING ESTABLISHMENT. An enterprise usually consisting of a single physical location where raw materials are transformed into new products.

MARITAL STATUS. Classification refers to the status at the time of census enumeration. Separated persons are those living apart because of marital discord, with or without a legal separation. Persons in common-law marriages are classified as married; persons whose only marriage has been annulled are classified as never married; all persons under age 15 are classified as never married. Single persons are those classified as never married.

MARKET REGION. As defined by the BEBR, the counties from which a metropolitan area draws trade and in which its lending institutions make loans. (See map of market regions in Section 1.00.)

MARKET VALUE. Amount a seller reasonably expects to obtain in a market for commodities, merchandise, services or whatever is being sold.

MARRIED-COUPLE FAMILY. Family in which the householder and spouse are counted as members of the same household.

MEMBERSHIP. Used in publications on school statistics, the number of pupils registered at one point in time, usually the fall.

METROPOLITAN POPULATION. Population living in metropolitan statistical areas (MSAs).

METROPOLITAN STATISTICAL AREAS (MSAs). A geographic area with a large population nucleus together with adjacent communities which have a high degree of economic and social integration with the nucleus. An MSA may include entire counties and generally has a city of at least 50,000 population or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. These areas were designated as Standard Metropolitan Areas prior to January 1983. See maps at front of the book for lists of counties in SMSAs and MSAs.

MOBILE HOME. Moveable dwelling, ten or more feet wide and thirty-five or more feet long (a moveable dwelling of less than these dimensions are considered to be travel trailers or motor homes), designed to be towed on its own chassis, and without need of a permanent foundation.

MODULAR HOUSING. See Mobile home.

MILITARY PERSONNEL. See Residency.

MONEY INCOME. See Income.

MUNICIPALITY. Political subdivision within which a municipal corporation has been established to provide a general local government for a specific population concentration in a defined area. In Florida, municipalities may be called cities, towns, or villages and have been established either by special acts of the legislature or by general law.

NONFAMILY HOUSEHOLDER. See Householder.

NONMETROPOLITAN POPULATION. Population living outside of metropolitan statistical areas (MSAs).

NONPERMANENT RESIDENTS. Persons who indicated on the census form that everyone at the residence was staying only temporarily and had a usual home elsewhere.

NONRELATIVES. Any persons in the household not related to the householder by birth, marriage, or adoption. Includes roomers, boarders, partners, roommates, paid employees, wards, and foster children.

OCCUPATIONAL LICENSING. Required operational licenses for professional persons who operate at the retail level such as dispensing opticians or pharmacists.

OCCUPIED HOUSING UNIT. See Housing unit.

OWNER-OCCUPIED HOUSING UNIT. See Housing unit.

PERSONAL INCOME. See Income.

PERSONS PER FAMILY. Number of persons in families divided by the total number of families.

PERSONS PER HOUSEHOLD. Number of persons living in households divided by the number of households.

PLACE OF BIRTH. For census enumeration, the mothers usual state or country of residence at the time of birth. Native-born persons are those born in the U.S., Puerto Rico, or an outlying area of the U.S. Includes a small number of persons born at sea or in a foreign country but with at least one American parent. Foreign-born persons are those not classified as native-born.

PLACE OF WORK. Geographic location at which workers carried out their occupational activities.

POVERTY STATUS. Income levels determined by federal interagency committees which (depending on family or household size) define a family or household as being in extreme want of necessities. Income cutoffs used by the Bureau of the Census to determine the poverty status of families and individuals consist of 48 thresholds arranged by family size and by presence and number of family members aged 18 and under. Unrelated individuals and two-person families are differentiated by age of householder.

Poverty thresholds are revised annually to allow for changes in the cost of living as reflected in the Consumer Price Index and are computed on a national basis only.

POVERTY THRESHOLD. See Poverty status.

PRIVATE SCHOOL. Any school which is supported by private funds.

PROPERTY INCOME. See Income.

PROPRIETORS' INCOME. See Income.

PUBLIC ASSISTANCE INCOME. See Income.

PUBLIC SCHOOL. Any school which is controlled and supported primarily by a local, state, or federal agency.

RACE. In census enumeration, reflects self-identification by respondents and does not denote any clear-cut scientific definition of biological stock.

American Indians, Eskimos, and Aleuts include persons who classified in one of these specific categories or who entered the name of a specific Indian tribe.

Asians and Pacific Inslanders include persons who indicated their race as Japanese (also Nipponese and Japanese American), Chinese (also Taiwanese and Cantonese), Filipino, Korean, Vietnamese, Asian Indian, Hawaiian, Guamanian, or Samoan.

Black persons includes those who indicated their race as Black or Negro, as well as persons who classified themselves as Jamaican, Black Puerto Rican, West Indian, Haitian, or Nigerian.

Other race category includes Asian and Pacific Islander groups not listed separately (Cambodian, Laotian, Pakestani, of Fiji Islander); persons who wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican; and persons who indicated other races not included in specific categories.

White persons include those who indicated their race as "white," as well as persons who entered a response such as Canadian, German, Italian, Lebanese, or Polish.

RENT OR CONTRACT RENT. Monthly payments made for the temporary occupancy of a building, regardless of any furnishings, utilities, or services that may be included. The statistics on rent are tabulated for "specified renter-occupied" housing units and for "specified vacant for rent" housing units which include renter units except one-family houses on 10 or more acres. In census enumeration excludes any rent paid for additional units or for business premises. Renter units occupied without payment of cash rent are categorized separately as "no cash rent."

RENTER-OCCUPIED HOUSING UNIT. See Housing unit.

RESIDENCY. The place where a person lives and sleeps most of the time. This place may not be the person's legal or voting residence. College students are considered to be residents of the community in which they live while attending college. Military personnel (persons in the armed services) are counted as residents of the area in which their installations are located.

RETAIL TRADE. Businesses primarily engaged in selling merchandise for personal, household, or farm consumption.

RURAL FARM POPULATION. Only in rural areas and includes all persons living on places of one acre or more from which at least $1,000 worth of agricultural products were sold during 1979.

RURAL POPULATION. Population not classified as urban.

SCHOOL DISTRICT. A political organization and jurisdiction that supports and administers local public schools. There is an independent school district in each Florida county and 28 community college districts.

SCHOOL ENROLLMENT. Cumulative number of students registered during a school year.

SEPARATE LIVING QUARTERS. Where occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall.

SERVICE INDUSTRIES. Establishments primarily engaged in rendering a wide variety of services to individuals and to business establishments.

SOCIAL SECURITY INCOME. See Income.

SPANISH OR HISPANIC ORIGIN. Persons who classified themselves in one of the Spanish origin categories listed on the census questionnaire--Mexican, Puerto Rican, Cuban, or other Spanish/Hispanic origin.

SPECIAL DISTRICT. A local government entity that has been established to provide one or more specific functions such as fire protection, public transit, water management, libraries, or hospitals. About one-third of Florida's special districts have taxing power.

STANDARD METROPOLITAN STATISTICAL AREAS (SMSAS). See Metropolitan Statistical Areas.

TENURE OF HOUSING UNIT. See Housing unit.

TRANSFER PAYMENTS. General disbursements to persons for which they do not render current services. These include payments by government and business to individuals and nonprofit institutions.

TRANSPORTATION. See Means of transportation to work.

UNEMPLOYED PERSONS. Persons 16 years of age and over who do not work and who actively seek employment, and who are available to work except for temporary illness (during a reference week).

UNITS IN STRUCTURE. The number of occupied and vacant housing units in a "structure" or separate building.

UNRELATED INDIVIDUAL. Householder living alone or with nonrelatives or household member who is not related to the householder by blood, marriage, or adoption or person living in group quarters who is not an inmate of an institution.

URBAN POPULATION. Comprises all persons living in urbanized areas and in places (incorporated and unincorporated) of 2,500 or more inhabitants outside urbanized areas.

URBANIZED AREA. Incorporated place and adjacent densely settled surrounding area that together have a minimum population of 50,000.

VACANT HOUSING UNIT. See Housing unit.

WHITE PERSONS. See Race.

WHOLESALE TRADE. Establishments primarily engaged in selling merchandise to retailers, to institutions, to industrial, commercial, and professional users, or to other wholesalers.

WORKERS. See Labor force, Civilian labor force, and Class of workers.
